TOTAL	849.862	1.029.507	83

Structure by type of cargo

GENERAL CARGO

- General cargo accounts for 36 % of turnover, and in 2025 it decreased by 13% compared to the previous year
- within general cargo, the largest decrease was recorded in metal products (steel products), due to a decrease in their production on the European market, and exports to the world market
- we also recorded a decrease in the transshipment of refrigerated cargo as a result of changes in the logistics directions of movement of this cargo category.
- a decline in livestock transshipment was also recorded as a result of the outbreak of foot-and-mouth disease in neighboring countries, primarily Hungary, and the Republic of Croatia banned the traffic of livestock from that country from early April 2025 until early June 2025.
- in the second quarter of 2025, a positive move was made towards the realization of transshipment of new, more profitable types of cargo (vehicles), with the intention of increasing the volume of transshipment of this cargo category

BULK CARGO

- Bulk cargo dominates the transshipment structure and accounts for 51% of total cargo
- Bulk cargo traffic recorded a 27% decline in traffic compared to the first half of 2024, primarily due to a decline in grain and coal traffic
- The decline in grain traffic occurred due to adverse climate change, a decrease in grain prices on world stock exchanges and changes in logistics routes
- The decline in coal traffic is a consequence of changes in cargo supply chains
- a decrease in scrap metal traffic is a result of the fall in the price of this type of cargo on the destination market.

CONTAINERS

- Container transport accounts for 13% of the total transhipped cargo. Container traffic is on the rise, and has grown by 37 % compared to the first half of 2024.

Revenues from the sale of services fell by 10% and amounted to €12,684 thousand compared to the realization achieved in the same period of the previous year (2024: €14,068 thousand). Revenues in the period are lower due to a lower volume of cargo transshipment, primarily general cargo in the metal products segment, refrigerated cargo, and livestock transshipment, and within the bulk cargo, the volume of grain, coal and scrap metal transshipment decreased.

Operating expenses for the stated period amounted to €14,224 thousand, which represents a decrease of 3% compared to the previous year. Expenses for material costs were reduced by 13%, while the largest part of operating expenses falls on personnel costs, which remained at the same level as the previous year. Staff costs also include other employee benefits, most of which refer to non-taxable benefits.

The company achieved a negative financial result in the observed period, and the operating loss for the first quarter of 2025 amounted to € -1.040 thousand.

The EBITDA margin achieved in the first quarter of 2025 is 9,90% and is 32 % lower than the same period last year (14,66 %).

Investment

The investment in the expansion of the Container Depot in Škrljevo continues with a total value of 5.7 million euros, which began in the third quarter of 2024. The project relates to the expansion of the container depot and the arrangement of a new storage and operational area, namely the construction of 9 additional plateaus for the placement of containers on an area of 66,615 m², and the arrangement of internal roads on it, with the necessary storm drainage and outdoor lighting, along with the asphaltting of the storage areas and the construction of additional electrical connections. The implementation of the project is expected to increase traffic, in the part of the manipulation and storage of empty containers, and it also opens up the

possibility of providing a new service, the manipulation of full containers, which is currently taking place on a very modest scale.

As part of the aforementioned project, works worth 1.39 million euros have been carried out by the end of 2024. During the first half of 2025, the project continued, and work worth 1,95 million euros was carried out.

In addition to the construction of new storage areas, it was also necessary to rehabilitate the embankment on the edge of the Container Depo terminal. The value of the works carried out in 2025 is 0.2 million euros.

At the Škrljevo Terminal, it is planned to start the construction of an integrated solar power plant, as one of the imperatives of the green transition in the field of energy, which, in addition to positive environmental impacts, also has positive economic impacts, through reducing electricity costs. The tender documentation has been published, and bids are being collected, with the intention of starting the construction by the end of 2025.

During March, a worn-out shore crane for timber handling was dismantled at the Bakar terminal on the Goranin pier and replaced with a higher-quality second-hand crane supplied from the Port of Split. The crane was thoroughly repaired by the Company's maintenance department and installed on the Goranin pier. The crane was put into operation in May 2025.

It is also planned to replace other worn-out cranes on the Goranin pier with a second-hand crane, which we have already purchased. It is expected that this crane will undergo repairs during the second and third quarter of 2025, and will then be installed and put into operation by the end of 2025.

During the second quarter of 2025, the process of re-categorization of fire risk at the Rijeka Terminal began, the total value of which will be 0.2 million euros. The completion of the activity is planned by the end of the current year.

The impact of the Russian invasion of Ukraine on the Company's operations

The war in Ukraine and the sanctions imposed on Russia have an impact on the world economy, and therefore on the European and Croatian economy, and indirectly on the Company's operations. Due to Russia's invasion of Ukraine and the interruption of the operation of their ports, there were significant disruptions of traffic routes through the ports of the Black Sea, as well as finding alternative traffic routes. The secondary effect of the conflict is visible in market disruptions in the supply of energy, disruptions in the food products market, and the growth of the inflation rate, which has an impact on the Company's operations, partly in the increase in operating costs. The company intends to continuously monitor costs, and with quick business decisions to influence the achievement of cost efficiency, which will result in more profitable operations.

The impact of the Red Sea crisis on the Company's operations

The Port of Rijeka, like all other ports in the world, is exposed to the action of a number of factors that can lead to a change in the direction of movement of ships, i.e. to a change in the flow of goods, which indicates the sensitivity of port systems and the great demands for the reorganization of entire logistics chains in order to enable smooth flow of goods. Due to the crisis in the Red Sea, shipping companies are rerouting their ships via the Cape of Good Hope, which increases the ship's travel time and also increases freight rates. It is difficult to predict to what extent the crisis will affect business; it will certainly depend on the duration of the navigation restrictions and the willingness of all shippers to maintain the existing lines at the ports of call.
